By the President:
RICHARD M. YOUNG,
Commissioner of the General Land Office.

To the Public.

To the Public.

The lands embraced in the above proclamation are located principally on and adjacent to the Mississippi and St. Croix rivers. Those designated as mineral are extremely valuable; because, in addition to the copper and other ores found in them, they are well watered, and have redy access to market, either to the South, by the Mississippi river, or to the East, by the way of the lakes, and the several lines of communication that connect therewith.

Valuable timber and all other necessary requisites for building and smelling, are found in great abundance, and of the finest quality. The climate is healthy and pleasant—the cold being rarely more intense than in the northern part of New York—and many of the lands are exceedingly fertic, producing all the grains and vegetables that can be raised in Mas-achusetts and northern New York.

Myps showing the localities of the mines, and other valuable information relating thereto, derived from the geological survey, Yoc, which cannot be embraced in this brief notice, will be prepared and deposited in the land office at St. Croix for inspection as early as practicable before the commencement of the public sales.

RICHARD M. YOUNG,

To the Pablic.

The "mineral lands" included in the foregoing proclamation are chiefly situated between Lake Superior and the Montreal river, and on Isle Royale, in the northern periods of Michigan, and are rendered immensely valuable by the exhaustless mines of copper and other ores found targets. rein. considerable number of those mines have already been

pure; and, in fact, most of the native copper and or yield a greater per centage than any other yet discovere in the world. Silver is also found in considerable qua-

Broadway, corner of Barclay street, New York.

Broadway, corner of Barclay street, New York.

THE proprietors, TABER & BAGLEY, respectfully announce to their friends and the public that they have lessed this well-known hotel, and have made many important improvements and repairs. A new and splendid ladies' ordinary will soon be completed, also additional rooms on Broadway.

It is furnished entirely with new furniture made expressly to their own order. It is their determination to make it one of the best and most fashionable resorts for the travelling public that can be found in this country. Its situation is unsurpussed, being directly in front of the Park and Fountain, where the Croton is continually playing, cooling and refreshing the air; also within a short distance of the steamboat and railroad landings.

The tables will at all times be bountfully supplied with the delicacies of the season, and their wines and liquors, having been selected with great care, cannot full to give satisfaction.

The proprieters hope, by personal politeness and attention, to merit the support and confidence of the public.

A considerable number of those mines have already been discovered in the trap ranges, within a few miles of Lake Superior; and from the geological character of the country, and the explorations already made, it cannot be doubted that others equally, if not more valuable, will be found throughout this whole "mineral region." In some of the mines now worked, cooper is found almost pure; and, in fact, most of the native copper and oresponding to the contract that any other yet discovered.

in the world. Silver is also found in considerable quantities.

All the necessary materials for the construction of furnaces, and fuel for smelting, are found in abundance in the immediate neighborhood of the mineral.

The climate in the winter, though cold, does not interrupt the operations of the miner;—in fact, that senson is considered the most favorable for their operations.

The proximity of these mineral lands to the shore of lake Superior, on which are several safe and excellent harbors, and the water communication therefrom, by the Sauti Semarie, lakes Huron, Eris, &c., farmish ready means of teansporting the products of these lands to the principal markets of the United States at a very triling cost.

It likewise appears from the reports to this office, that the agricultural lands are of a fair quality, producing the usual culimary vegetables and grass in abundance, and, when properly tilled, they have been found favorable for grain crops also; and for all these products, a lair price and good market will be found at the mines.

Timber—such as white and yellow pine, sugar maple, yellow birch, &c.—is, in many places, very abundant, and by its trifly growth gives evidence of the rinness of the soil.
